

# Let's get started >

- 1 Ensure your modem is working properly with an active internet connection and that your modem has a free Ethernet port.
- 2 Unpack your **Power<sup>n</sup> Series Wireless Router** and check you have everything listed in the package contents (found on the base of the box)
- 3 Attach the antenna to the unit.
  - 2 x Antenna for **Power<sup>n</sup>**
  - 3 x Antenna for **Power<sup>n+</sup>** and **Power<sup>n+</sup> gigabit**

# Connecting your Router

- 1 Power off **all** your devices
- 2 Using the supplied Ethernet cable, connect your Broadband Modem to the **WAN** port found at the back of the Router.
- 3 Connect your PC to any **LAN** port (1,2,3,4)
- 4 Connect the **Power Cable** (12VDC)
- 5 Power on the PC, Modem and Router
- 6 Open a **web browser** to check your connection.  
(If a problem arises consult the User Manual on your resource CD for more detailed instructions)

## Establish a Wireless Connection

You can connect multiple wireless devices including laptops, desktops and PDA's to your 11n Wireless Router by following the 2 basic steps:

- 1 Using your wireless device, scan the wireless networks in your area and select the network called **NetComm 800n Series**. Then click **Connect**.
- 2 Enter the following default security key: **a1b2c3d4e5**
