

# Let's get started >

Unpack your **CC100 Coax MDU Master Bridge** and check that you have the following items:

- 1 x CC100 Coax MDU Master Bridge
- 1 x 5VDC 1A power supply
- 1 x RJ45 Ethernet Cable
- 1 x Coaxial Cable
- 1 x Manual (on CD)
- This printed Quick Start Guide

### Connect your device

1. Connect your VHF/UHF antenna cable or Satellite/CATV cable to the CC100 TV/Antenna port.
2. Using the supplied Coaxial Cable, connect one end to the HCNA port on your CC100 and the other end to your existing coax antenna socket or splitter.
3. Using the supplied RJ45 Ethernet cable connect one end to a spare LAN port on your Modem/Router and the other end to either LAN port on your CC100.
4. Connect the supplied power adapter to the wall power outlet and to the socket labelled DC5V on the CC100.
5. For further instruction on how to configure the master bridge please consult your user manual.

**NOTE:** To add a billing solution to your service, you will need to configure your CC100.
