

Configuring a V220 with a Dodo VoIP account.

Before proceeding you will need to complete the setup of all required hardware components as per the User Guide that came supplied with your V220.

Ensure that you have the following information on hand. This information will be provided by Dodo.

1. VoIP Username
2. VoIP Password
3. Sip Proxy Server/Domain Name
4. Codec

Connect your V220 to your computer. Ensure that your computer is connected via an ethernet cable to the LAN port of the VoIP ATA. The WAN port of the V210P should be connected to the ADSL/cable modem or router (Internet Source).

Now open up your web browser (Internet Explorer or Mozilla Firefox or Safari or any other browser). In the address bar, type <http://192.168.22.1>

Now Press enter or click on "go". The Login screen will now appear as per the picture below

A screenshot of the "Login V220" web interface. The page has a blue header with the text "Login V220". Below the header, the text "Enter your username and password to login" is displayed, followed by "V220". There are two input fields: "Username" with the text "admin" entered, and "Password" with six black dots. At the bottom of the form, there are two buttons: "Login" and "Clear".

- In the Username field, type in **admin**
- In the Password field, type in **admin**
- Click on the **Login** button

- ⤴ You will then be presented with the System Information page.
- ⤴ Click on **"VoIP"** on the left hand side and then click on **"SIP Service Provider"**.

Save Settings / Reboot

You have to save settings & reboot to effect them.

Save Settings and reboot:

You can press the reboot button to restart the system.

Reboot system without saving settings:

- ✦ After rebooting the V220, check the status of the lights. The SIP light should turn ON. That means the V220 is connected to Dodo. You can also check within the V220 GUI interface by clicking on **“VoIP Status”** from the left hand side menu.
