- 12 Connect with your remote office

MAKE A NOTE OF YOUR TELSTRA DETAILS

**You may wish to note these details below
for easy reference**

EMAIL ADDRESS

PASSWORD

It's a good idea to protect your security by writing down a clue for yourself, rather than your actual password.

IMPORTANT: READ THIS FIRST

Before connecting any cables, make sure that you have the “USB Key with installation software and manual” (pictured below). You will find this inside the box that your Telstra Ultimate® Gateway came with.

Insert this into any USB port on your computer for a step-by-step guide to connecting and configuring your Telstra Ultimate Gateway.

Please pay particular attention to the USB content during the installation process. Failure to do so may result in an unsuccessful installation.

GETTING STARTED

YOUR PACKAGE CONTAINS:

- Mobile broadband gateway
- External power supply
- Ethernet cable
- Security card
- This Getting Started Guide
- USB Key with installation software and manual

YOUR TELSTRA ULTIMATE® GATEWAY:

GETTING CONNECTED

The Installation USB Key will guide you through everything you need, from setting up your hardware and connecting the cables to your Telstra Ultimate® Gateway, through to installing the connection manager software.

Simply insert the Installation USB Key into the USB port on your computer.

WINDOWS® USERS

The installation should load automatically. If it doesn't, open **My Computer** and double-click on the **Telstra Ultimate Gateway Installer.exe** icon and follow the simple step-by-step instructions to set up your Telstra Ultimate® Gateway.

MAC USERS

Double-click on the **ULTIMATE GW** icon on your desktop and open the **Mac** folder.

Double Click on the **Telstra Ultimate Gateway Installer** icon and follow the simple step-by-step instructions to set up your Telstra Ultimate® Gateway.

INSTALLING CONNECTION SOFTWARE

The Installation USB Key will guide you through setting up your Telstra Ultimate® Gateway.

During the setup process you will be asked to choose whether you want to set up a “Wired” or “Wireless (Wi-Fi)” connection if your computer has a Wi-Fi adaptor. If you select the wireless connection, please make sure that you enable the wireless network connection function on your computer.

TELSTRA MOBILE NETWORK
POWERED BY ANGSTROM

1 SET UP YOUR WIRELESS GATEWAY 2 CONNECT TO TELSTRA MOBILE SERVICES

HOW DO YOU WANT TO CONNECT TO THE GATEWAY?

Please select if you want to connect the gateway by [Ethernet Cable](#) or [Wi-Fi](#).

I WANT TO CONNECT BY ETHERNET (WIRED)
Select this option if your computer does not have a wireless adapter or you would prefer to connect to the gateway with a cable.

I WANT TO CONNECT BY WI-FI (WIRELESS)
Select this option if your computer has a wireless adapter and you wish to connect wirelessly to the gateway.

WHAT IT ALL MEANS

Now that you've set up your Telstra Ultimate® Gateway, here's a quick guide to what it all means. Once your device is powered up and running you will notice a series of lights. These will light up, flash or turn off depending on the activity of your Telstra Ultimate Gateway.

1 High signal strength (Next G®)

2 Medium signal strength (Next G®)

3 Low signal strength (Next G®)

4 2G

5 3G

6 LAN 4

7 LAN 3

8 LAN 2

9 LAN 1

10 Internet

11 Wi-Fi- local wireless network

12 Power

13 Power button

CONNECT WITH YOUR REMOTE OFFICE

You can connect multiple devices to your Telstra Ultimate® Gateway, including laptops, desktop computers, Wi-Fi enabled handsets and Tablets. To connect your remote office with the Telstra Ultimate Gateway, follow these steps:

1. Using your Wi-Fi enabled device, scan for Wireless networks (refer to the user manual of your laptop, desktop or tablet for instructions on how to scan for wireless networks).
2. Locate the wireless network name (SSID) shown on the wireless security card. (This information is also available on the bottom of your Telstra Ultimate Gateway).
3. Click **Connect To Your Wireless Network**.
4. When prompted for your wireless security settings, enter the wireless security key (WPA2) found on the wireless security card.
5. Now you can connect with your remote office.
