-  Now with V.92 for the fastest connections and auto fallback for full compatibility
-  Bus Powered – no external power supply needed
-  USB hot swappable Plug & Play for easy installation
-  Automatic detection between data and fax calls

# Rave II USB V.92 Modem

Don't hang back! Jump online at V.92 with this simple, Plug & Play USB modem

If you've got a USB (Universal Serial Bus) enabled Windows® based PC and you're not hitting the Internet at full speed, you need to **RAVE!** The NetComm Rave II USB V.92 lets you jump online at full speed. And because it's USB, just Plug & Play and you're away!

### It's a super-fast modem!

Nothing less than 56K should do for your Internet access. This NetComm Rave II USB V.92 modem delivers full V.92\* 56K speed which, with compression, gives you up to a blistering 230,000 bps throughput! Now that's fast!

### It can take Voice Mail!

You can set up your PC as an answering machine, with separate voice mailboxes for different members of your household, or you can have separate mailboxes for your business and personal needs.

### It's a fax!

Any self-respecting modem should send and receive your faxes, straight from your PC. And the Rave II USB V.92 does just that, with a minimum of fuss.

### It's fast!

The NetComm Rave II USB V.92 is fast enough to whizz through your downloads. Now you can hear those MP3s sooner, play games faster, and shopping, banking or just surfing, you'll love the way those web pages fly!

\* Your Internet Service Provider must support the V.92 standard. If a V.92 connection is not available, this modem automatically reverts to the 56K V.90 mode.
