EM1550C	NetComm Gateway™ Series ADSL2+ Splitter Filter	9317773013573

NetComm® NETCOMM GATEWAY™ SERIES ADSL2+ Splitter-Filter

Most broadband subscribers commonly share their ADSL broadband service and phone equipment over one telephone line. The higher frequencies used with ADSL can interfere with the operation of your telephones, fax and answering machines.

The NetComm ADSL Splitter-Filter EM1550 splits your telephone line into two connection points – one for your ADSL modem and the other for telephone equipment. The embedded microfilter ensures that ADSL frequencies do not interfere with the normal operation of your telephone devices.

The EM1550 High Performance filter is designed to isolate all voice band equipment. The EM1550 is Telstra RCIT.0004 Approved and supports high speed ADSL services up to 24Mbps (ADSL2+).

TECHNICAL SPECIFICATIONS

PHYSICAL

Material: Plastic high impact ABS

Dimensions:

Height 18 mm

Width 38 mm
