

NETCOMM GATEWAY™ SERIES  
ADSL2+ Wireless N150  
Modem Router

*NetComm*™

# 1

## Connecting Your Device

- Connect the supplied **RJ-11 cable** to the ADSL port on the back of your router, and then to the phone port that supplies your ADSL.
- Connect the supplied **RJ-45 Ethernet cable** to one of the LAN ports on the back of your router and to the LAN port on your computer
- Connect the supplied power adapter to your router and press the **on/off** button to power the router on.

# 2

## Easy Configuration

- Insert the provided CD into your PC
- The CD will autorun. Click on **Easy Configuration**
- If it does not autorun navigate to your CD/DVD drive and double click on the CD icon . Alternatively you can also use the web user Interface as described in Step 3.

# 3

## Login to the web interface

---

**NetComm**®

---

### Quick Start

The Wizard will guide you through these four quick steps. Begin by clicking on **NEXT**.

Step 1. Set your new password

Step 2. Choose your time zone

Step 3. Set your Internet connection

Step 4. Save settings of this ADSL Router

NEXT EXIT

Note: Use the web interface as an alternate Quick Start option and for all advanced configurations

- Open a web browser (Internet Explorer, Firefox, Safari) and type **192.168.1.1** into the address bar.
- At the login screen type **admin** into both the **username** and **password** fields. Then click **submit**. This will take you into your web configuration page

### Quick Setup

- From the top menu, click on **Quick Start**
- On the screen that appears select **Run Wizard** and follow the steps to setup your ADSL connection
- Upon completion of the Quick Start Wizard, you will be able to access the Internet and share your connection

# 4

## Establishing Wireless Connection

You can connect multiple wireless devices, including laptops, desktops and PDA's to your NB14WN by following these two basic steps.

- Using your wireless device, scan the wireless networks in your area and select the network that you named in the Quick Start Wizard. The default is **NetComm Wireless**. Then click **connect**.
- Enter the wireless password that you also specified in the Quick Start Wizard. The default security key is **a1b2c3d4e5**

# 5

## Troubleshooting

### **Cannot establish a wireless connection**

- Make sure the wireless switch on your laptop is in the on position
- Ensure your device and wireless adapter are using the same wireless security settings

### **Cannot connect to the Internet through the NB14WN**

- Make sure that you have entered all of the correct details as supplied by your ISP in the quick setup section when connecting to the Internet
- Double check all connections have been made into the correct ports
- To check the status of your connection, login to the web user interface as previously mentioned.
