Firmware Details

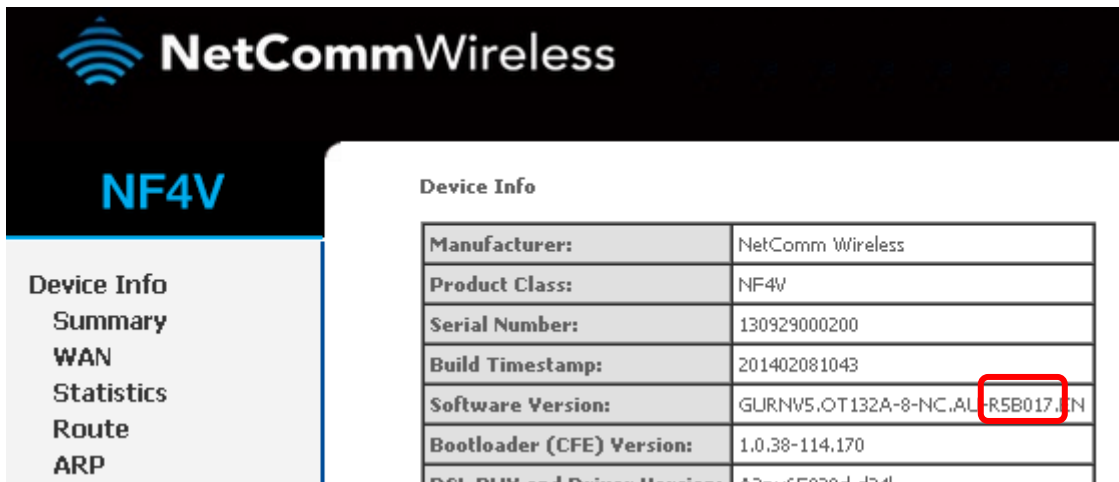

ITEM	DESCRIPTION
Model	NF4V
Product Name	VDSL/ADSL WiFi Gigabit Modem Router
Date	February 18, 2014
Firmware Version	R5B017
Official / Beta Firmware	Official
File Name	GURNV5.OT132A-8-NC.AU-R5B017.EN_upgrade
File Size	10.3MB
MD5 Checksum	AC62A298FF35D66470A81ACA0922B9BF

Firmware Upgrade Instructions

1. Connect the supplied RJ-45 Ethernet cable from one of the Ethernet Ports on the back of the device to your computer.
2. Connect the supplied power adapter to your router and press the on/off button to power the router on.
3. Allow 60 – 90 seconds for the NF4V to power up.
4. Open a web browser (e.g. Internet Explorer, Firefox, Safari, etc) and type <http://192.168.20.1> into the address bar and press Enter.
5. At the login screen, type **admin** into both the Username and the Password fields and click **OK**.
6. Select **Management** and then **Update Software** from the menu on the left side of the screen. Select **Browse / Choose File** to locate and load the firmware (**GURNV5.OT132A-8-NC.AU-R5B017.EN_upgrade**)

7. Click **Update Software** to proceed. The process will take a few minutes until the router reboots itself.
8. Once the upgrade is done, you will be brought into the Status page. Make sure the current firmware is **R5B017**.

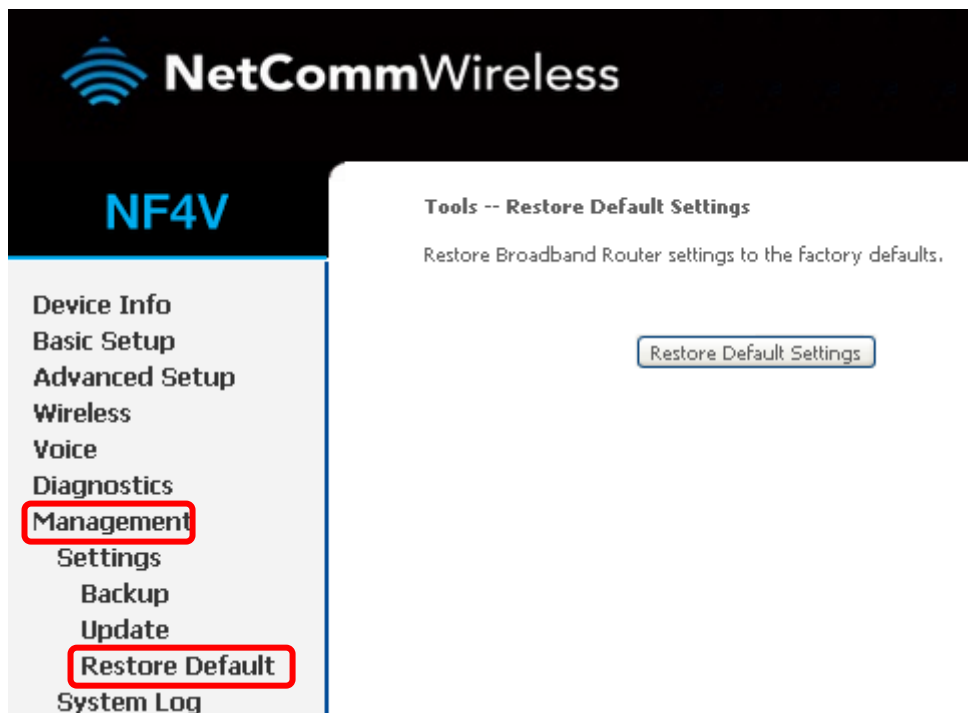

The screenshot shows the NetComm Wireless NF4V web interface. On the left is a navigation menu with options: Device Info, Summary, WAN, Statistics, Route, and ARP. The main content area is titled "Device Info" and contains a table with the following data:

Manufacturer:	NetComm Wireless
Product Class:	NF4V
Serial Number:	130929000200
Build Timestamp:	201402081043
Software Version:	GURNV5.OT132A-8-NC.AL-R5B017.01N
Bootloader (CFE) Version:	1.0.38-114.170

The "Software Version" field is highlighted with a red box.

- Using the menu on the left side of the screen, select **Management** then **Settings** and then **Restore Default**. Click the **Restore Default Settings** button to reset the device.

The screenshot shows the NetComm Wireless NF4V web interface. The left navigation menu has "Management" and "Restore Default" highlighted with red boxes. The main content area is titled "Tools -- Restore Default Settings" and contains the text "Restore Broadband Router settings to the factory defaults." and a button labeled "Restore Default Settings".

Note: You must reset the router to the default settings after the firmware upgrade to ensure that it functions correctly.

New Features

R5B017

- Implemented VoIP call history and call status on the Web User Interface
- New bind interface for VoIP: Any_WAN which enables the router to select any interface that is connected to the Internet to be bound with the VoIP service automatically.
- New Speed Dial feature
- Ping Test feature is now available on the Web User Interface under the Diagnostics menu
- Backup config file is now encrypted
- VDSL profile status is now shown on the Device Info page
- VDSL service is now tagged as VLAN ID 10 by default

Bug Fixes

R5B017

- Fixed Time Zone issue
- Fixed Quick Setup feature for PPPoA
- Fixed Primary DNS Server issue
- Fixed some cosmetic issues

Known Issues

R5B017

- None
