

NB9WMAXXn Firmware Upgrade Instructions

1. Connect a computer to any LAN socket on the NB9WMAXXn using an ethernet cable.
2. Open the web browser (IE, Mozilla Firefox, etc) on the computer, type in <http://192.168.1.1> on the address bar, and then press Enter.
3. On the left-hand side menu, click on Management > Device Settings > Update Firmware.
4. On the right-hand side, click on the Browse button to search your local hard drive and locate the firmware to be used for update. Select the firmware file and press Open.
5. Click Update Software to proceed. It will take a few minutes until a message show up to indicate the upgrade succeeds.
6. Do not turn off the modem during the upgrade.
7. Please double check if the software version is NB9WMAXXn-D111-S310NCM-C01_R10, go to next step if it is, otherwise, please go back to step 1.
8. Go to Management > Device Settings > Restore Default, click "Restore Default Settings" button then click Ok in the pop up window to implement restore default settings on NB9WMAXXn.
9. The NB9WMAXXn will reboot itself again. Please wait for at least 2 minutes.
10. The firmware upgrade is now complete.
