COMPANY ANNOUNCEMENT

7th May 2010

NetComm receives initial orders from North American carrier

NetComm Limited is pleased to announce that it has received its first orders from a North American telecommunications carrier – TELUS – a significant further step in NetComm's concerted international marketing drive.

The initial orders total approximately \$US 1 million and NetComm anticipates regular monthly orders after TELUS launches the device. Shipment to Canada commences in May 2010.

TELUS has ordered a fully integrated 3G router that allows users to share a single mobile broadband connection wirelessly using the TELUS 3G+ network. To be marketed as the TELUS Smart Hub, this will be the first 3G router launched onto the TELUS 3G+ network and will deliver speeds of up to 7.2Mbps downlink and 5.76Mbps uplink.

TELUS is a leading national telecommunications company in Canada, with C\$9.6 billion of annual revenue and 11.9 million customer connections including 6.6 million wireless subscribers, 3.9 million wireline network access lines, 1.2 million Internet subscribers and 199,000 TELUS TV customers.

The agreement with TELUS provides NetComm with its first carrier in the rapidly growing North American 3G market. According to a report from Morgan Stanley (December 2009), 3G connections in North America are estimated to increase by 25% in 2010 compared to 2009.

About NetComm Limited

With over 27 years, experience, NetComm Limited is a leading developer of broadband Internet products and services. With particular expertise in 3G/HSPA
