NETCOMM CALLDIRECT SERIES Industrial 3G Cellular Multi-Port / Wi-Fi Router

NetComm[®]

NTC-8928 / NTC-8929

The NTC-8928 and NTC-8929 cellular routers allow you to build wide area networks utilising the superior speeds of cellular 3G networks. Employing an embedded 3G module they offer downlink speeds of up to 7.2 Mbps and uplink speeds of up to 5.76Mbps.

Both units feature an integrated Wi-Fi 802.11b/g access point with multiple inputs and outputs to connect to Wireless LAN clients with data speeds up to 54kbps and feature robust industrial housing and hardened CPUs, making them ideal for remote locations or harsh environmental conditions.

The NTC-8928 and NTC-8929 cellular routers provide you with a point-to-point or point-to-multipoint communications link in a single compact and resilient unit.

Multiple Ethernet interfaces, along with a variety of protocols, ensure these fully featured devices meet the demands of today's telemetry and WAN applications.

Designed with remote installation in mind, the NTC-8928 and NTC-8929 support multi-level system monitoring, giving you peace of mind the device will keep communication lines up and open.
