

Information

- Product Code: 3G9WT Telstra Turbo 7 Series Wireless Gateway(8780 module)
- Software Version: CM 1.1
- CFE Version: 1.0.37-6.8
- Wireless Driver: 3.131.35.4.cpe2.0
- Date: January, 2008

Install Instructions

Please upgrade gateway firmware to 3G9WT -N101-S306TMB-T01_R12 or later before install. IP WAN users are advised to configure the gateway via the web interface (<http://10.0.0.138> by default) therefore please do NOT install the connection manager

For PC\Windows User:

1. Unzip the image file [Telstra_CM_NetComm_3G9WT_8780_V1.1_Windows.zip](#) to a local hard drive;
2. If an old version of connection manager is installed on Windows, please go to START>Control Panel>Add or Remove Programs to delete the Connection Manager before go on;
3. double click on file [ConnectionManager.msi](#) to install;
4. Once finish, launch the connection manager when the gateway is connected to the PC.

For Apple Mac user:

1. Unzip the image file [Telstra_CM_NetComm_3G9WT_8780_V1.1_OS_X.zip](#) to a local hard drive;
2. Double click on the file TelstraWirelessGatewayInstaller.mpkg to run the Self Install Kit;
3. Follow the instructions to set up the 3G9WT gateway;
4. A window will pop up indicating set up has finished. The Connection Manger will be installed to the Mac to create the connection automatically when the gateway is connected to Mac OSX.

New Features

1. Connection Manager will detect SIM card status as follows and notify user. (PC and Mac)
 - SIM inserted
 - SIM not inserted
 - SIM is PIN locked: A window will pop up for user to input the SIM PIN code. User can select to have the gateway remember the PIN or disable PIN protection on the SIM card.
 - SIM is PUK locked: A window will pop up for user to input the PUK code.
 - Incorrect SIM is inserted: when a SIM from another ISP is inserted.
2. If an Internet connection is not established when 3G9WT is detected, Connection Manager will try all 3 APNs (telstra.datapack, telstra.pcpack, telstra.internet) for a connection. This is a function to support old SIM cards which only support Telstra. Internet. (Mac only; this function is performed by self-install-kit on PCs).

Fix

1. Fix the problem of connection fails and Connection manager could not detect the problem when the SIM is Pin protected; a pop up window is added to prompt the user to input the PIN number. (Available on PC and Mac)
