

## **Generic VoIP Setup Guide**

Before start configuring this unit for VoIP, you need to some information from your VSP (VoIP Service Provider) such as:

- VoIP Phone Number or Username
- VoIP Password
- Codec (For most of the service provider in Australia it is G729)
- SIP proxy address
- SIP proxy address
- Register Expire Time

Once you have get the information listed above from your VSP then you can follow these steps to configure your V90 for VoIP.

1. Navigate to <u>http://192.168.1.11</u> and press enter.

2. Enter "admin" for both username and password when prompted.

3. The main configuration page of the V90 will open. Select "Configuration" from the options on the left hand side.

4. Now click on "Call setting" and then type in the following information.

- Phone Number ٠
- VoIP Phone Number VoIP Phone Number
