

# HSPA+ WiFi Router 3G21WE

Combining the coverage and the speed of the Etisalat HSPA+ network, this HSPA+ WiFi Router enables you to set up and share your 3G connection. Multiple wireless and wired devices, can access high speed mobile broadband Internet without the hassle of a fixed line Internet connection. If you need a flexible Internet connection for your business, this is the perfect solution for you.

## HOW DOES IT WORK?

By simply inserting an Etisalat data SIM card into the USIM card slot found at the rear panel of the router, you can create a secure wireless connection to the Internet. Users can then share the one Internet connection with multiple wired or wireless devices.

## COST EFFECTIVE & VERSATILE

Multiple users can share the data connection making it very cost effective. Share a single connection with up to 20 wireless and wired devices including PC's, notebooks, Wi-Fi phones and smart phones.

## AT WORK OR AT HOME

Create a network in your office or at home with multiple devices, using either the 4 Ethernet ports for wired devices or 300Mbps WiFi for your wireless devices such as laptops and smart phones.

FREQUENT MOVERS / RENTERS

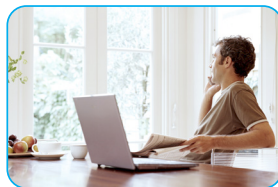

UNCABLED WORK SITES

3G SHARED

NO ADSL OR CABLE AVAILABLE

ON THE FRINGE

SMALL HOME OFFICE SETUPS

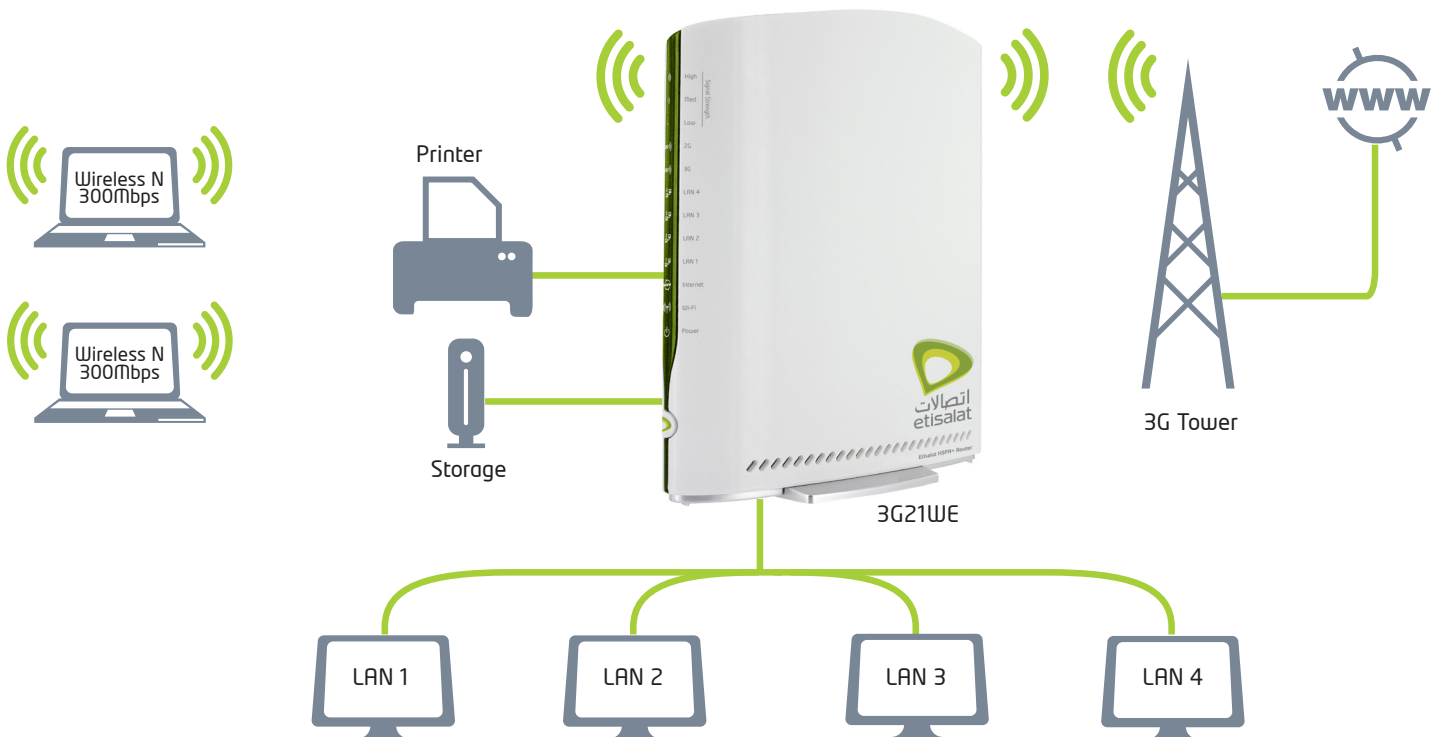

### WHAT ARE THE BENEFITS OF THE HSPA+ WIFI ROUTER:

- Ideal for customers who either don't have or can't get an ADSL connection into their home or office
- Provides high speed mobile broadband at speeds that rival what is available with fixed line ADSL
- HSPA+ Routers are portable. As long as you have power and you're within the Etisalat network - you can instantly set up a wireless hotspot
- Your connection moves with you. If you move your home or business, simply take your Internet connection with you
- Advanced wireless security gives your customers wireless peace of mind
- 2x USB ports allow users to connect a printer and an external storage device and share the capabilities within your network
- External antenna - Allows users to connect an external high gain antenna to get better signal coverage

### PRACTICAL APPLICATIONS OF THE HSPA+ WIFI ROUTER:

- Un-cabled work sites (E.g. construction, gas and oil fields)
- Homes or offices without ADSL access
- Small businesses that need a mobile Internet solution
- Frequent movers or renters who do not want to commit to a fixed line connection
- Outdoor businesses who cannot access a fixed line Internet connection
- Offsite meetings e.g. auditors
- Tradeshows / conferences
- Businesses who need an emergency Internet backup
- Customers who discover they cannot share their USB modem with family, friends or colleagues and need a device that will allow them to share their mobile broadband connection
