NetComm®

Instructions for installation of V25 VoIP Headset

1. Download and install your choice of VoIP soft phone client. The V25 is compatible with most soft phone clients including Skype, iChat, MSN, Windows Messenger, Yahoo Messenger and SIP soft phones etc

2. Plug the V25 RCA connectors to the sound card on your PC. The green connector plugs into the speaker port and the pink connector plugs into the microphone port

3. Ensure the microphone switch is turned to "on" and adjust the volume to a comfortable level

4. If the sound is too low with the headset at full volume you will need to adjust the volume control setting on your sound card. Windows users can double click the volume icon in the system tray or go to Control Panel –> Sounds

5. If your voice is too soft or distorted when speaking into the microphone you may need to adjust the microphone volume up or down as required on your sound card; or move the microphone closer/further from your mouth
