COMPANY ANNOUNCEMENT

11th May 2010

First Significant Order For NetComm's Call Direct NTC-6908

NetComm Limited is pleased to announce that its industrial 3G division, Call Direct, has received an initial order from IKUSI ANZ Pty Ltd – a subsidiary of Angel Iglesias, S.A. – for its new NTC-6908 model. The order value is approximately \$A1.2 million and is for the first phase of deployment, with delivery commencing in July 2010.

Call Direct gained this business by customising this new 3G modem so that it can be integrated into IKUSI's Digital Set Top Box. To be predominantly located in hotels, this device provides a wireless back channel which enables remote monitoring, management and upgrading of the Digital Set Top Box.

The remote system monitoring reduces field maintenance costs and ensures that gateway-related down time is minimised – critical for this application. The industrial design of the NTC-6908 also caters for a wide temperature range so that it can be used in just about any location.

As part of its international expansion programme, NetComm is also pursuing overseas markets for Call Direct's industrial 3G range.

About NetComm Limited

With over 27 years, experience, NetComm Limited is a leading developer of broadband Internet products and services. With particular expertise in 3G/HSPA devices, NetComm offers a diverse product portfolio addressing business, consumer and specialized vertical industries.
