

## Information

- Product Code: NB7Plus4W ADSL2+ Modem Router
- Firmware Version: 141.51.2-001
- Filename: 141.51.2-001\_fs\_kernel.bin
- Date: Tuesday, July 15, 2009

## Upgrade Instructions

**Note: Performing the instructions below will result in a reset to the default configuration of the NB7.**

1. Connect the computer to the LAN socket on the Modem.
2. Open the web browser (IE, Mozilla firefox, etc) on the computer, type in <http://192.168.1.1> on the address bar, and then press **Enter**.
3. On the left-hand side menu, click on **Management > Update Software**;
4. On the right-hand side, click on the **Browse** button to locate the firmware to be used for the update. Select the firmware file and press **Open**.
5. Click **Update Software** to proceed with the upgrade. It will take a few minutes until a message shows up to indicate that the upgrade has succeeded.
6. Do not turn off the modem during the upgrade.

## Fixes / Changes
