

Let's get started >

Unpack your **CC101 Coax Slave Ethernet Bridge** and check if you have the following items:

- 1 x CC101 Coax Slave Ethernet Bridge
- 1 x 5VDC 1Amp power supply
- 1 x RJ45 Ethernet Cable
- 1 x Coaxial Cable
- This printed Quick Start Guide

Connect your device

1. Unplug your TV or Set Top box's coaxial cable from the wall socket; then plug it into CC101's TV port;
2. Connect one end of the supplied coax cable to the coax wall socket and the other end to the HCNA port on the CC101.
3. Using the supplied RJ45 cable, connect your computer to either of the two LAN ports.
4. Connect the supplied power adapter to the wall power outlet and to the socket labelled DC5V on the CC101.
