COMPANY ANNOUNCEMENT

14 February 2011

NETCOMM LIMITED SHOWCASES LTE WIFI ROUTER AT THE MOBILE WORLD CONGRESS, BARCELONA

NetComm Limited (ASX: NTC) in partnership with Sierra Wireless, will be unveiling the NetComm Liberty™ Series LTE WiFi Router at the Mobile World Congress (MWC) in Barcelona from the 14th – 17th February, 2011.

NetComm's LTE technology will deliver data rates of up to 100Mbps download, and 50Mbps upload, while providing vastly superior coverage on emerging Long Term Evolution (LTE) networks worldwide.

The NetComm Liberty™ Series LTE WiFi Router has been developed to support the large-scale LTE network developments currently being undertaken by 180 network operators in 70 countries.

“While we look forward to releasing this highly advanced product when LTE networks' commence commercial service, we remain focused on supplying our telecommunications partners with carrier specific 42Mbps and 21Mbps with voice HSPA products in line with the evolution of their networks,” says NetComm’s managing director, David Stewart.

NetComm is currently working with carriers to test the NetComm Liberty™ Series LTE WiFi Router on trial LTE networks.

About NetComm Limited

NetComm Limited (ASX: NTC) is a leading developer and manufacturer of broadband technology. With 28 years of experience, NetComm develops a wide range of broadband products to facilitate worldwide networks. Its products are uniquely designed for each carrier requirement and to deliver the most reliable communications for consumer, business and industrial applications. With particular expertise in 3G/HSPA technologies, NetComm engineers world first 3G products that support evolving networks and deliver quality data communication products.
