

## **NETCOMM TO SUPPLY MOBILE GATEWAY TO ROGERS COMMUNICATIONS**

**7 July 2010** - Sydney Australia - NetComm Limited today announced the supply of its Mobile Broadband Gateway to Rogers Communications of Canada. This agreement reflects its continued expansion into the North American market.

The NetComm HSPA WiFi Gateway (3G10WVR) incorporates wireless LAN, an HSPA module and voice capabilities over the Rogers HSPA network.

NetComm is continuing its international expansion strategy growing both revenues and earnings. The Mobile Broadband sector has proven extremely resilient to Global Financial Crisis style conditions, with analysts estimating 3G connections in the North American market to increase by 25% during the 2010 calendar year.

NetComm's Managing Director, David Stewart welcomes the partnership with Rogers Communications.

"We are excited and humbled to be working with some extremely high calibre mobile operators at the forefront of Mobile Broadband," said Mr Stewart.

"Rogers represents a key milestone in our international expansion strategy, and we are working hard to continue the trend."

Shipments of the 3G10WVR will begin later this month.
