

Latest Firmware Version: V90S-3.08-14.pkg

NOTE

Please follow the steps below in order to upgrade the firmware on the V90S:

1. Log into the V90Sb Configuration page by entering the V90S's IP Address into a web browser.
2. Click on **Tools** on the left menu.
3. In **Upgrade Site**, enter the following: ftp:

<ftp://files.netcomm.com.au/V90S/V90S-3.08-14.pkg>

The screenshot shows the NetComm V90 IP Phone configuration interface. The top header features the NetComm logo and the text 'V90 IP Phone'. On the left is a navigation menu with options: Status, Configurations, Phone Book, Tools, and Logout. The 'Tools' section is expanded, showing 'Online Upgrade', 'Change Password', 'Reset Config', and 'Reboot'. The 'Online Upgrade' section is active, displaying 'Last Upgrade Time: 2009-02-11 07:29:49' and 'Current Version: V90S-3.08-12'. Below this is an 'Upgrade Site' input field and a 'Start' button.

4. Press the **Start** button.

The V90S will now begin the firmware upgrade. Please do not disconnect any cables or turn off the V90S at this point.
After approximately 2-3 minutes, the V90S will have finished the upgrade process.
